

COAL ROADMAP FOR SOUTH AFRICA

PUBLIC STATEMENT

24 MARCH 2010

At a meeting of the SA Coal Road Map (SACRM) held on 23 March 2010, following the accession of the Department of Energy to the initiative, a Board was established comprising representatives from the following organisations:

- The Department of Energy of the Government of South Africa;
- Exxaro;
- Anglo American;
- The SA National Energy Association (SANEA);
- Sasol;
- Eskom;
- Council for Geosciences;
- Consulting services to the SA coal industry.

A Steering Committee has also been established, comprising representatives of the above organisations and other stakeholders of the SA coal industry. The Fossil Fuel Foundation of Africa (FFF) has been appointed as administrator and the South African National Energy Research Institute (SANERI) as financial manager of the SACRM.

It is intended to appoint a project manager who will develop the Roadmap in conjunction with relevant experts from participating members. The SACRM will issue a call for expressions of interest to identify and pre-qualify suitable parties for the project manager role and a call for proposals will follow. The call for expressions of interest will be advertised on both the FFF (www.fossilfuel.co.za) and SANERI (www.saneri.org.za) websites.

Stakeholders and interested parties in the SA coal industry who would like to participate in the Roadmap process may obtain more information on the FFF website and enquiries should be routed via the FFF (projects@fossilfuel.co.za).
